

CUDA SURGICAL Rover IV Plus GUIDE

Value Proposition: The Rover IV Plus is an upgraded version of our Rover mobile lighting unit. Improvements to the design and function have increased its light output and made it more user friendly for a variety of uses. It now features 3 variable light levels that are activated by via the on/off switch. Its small form factor and battery run time make it ideal for use in clinical settings.

Features & Benefits:

- 3 Variable light levels – High (100 lumen), Medium (60 lumen), low (25 lumen)
- Ergonomic design for handheld use
- Color Temperature of 5000K
- Available with ACMI and Wolf connector
- Battery Life, 2.5 hours on high, 4.5 hours on medium, 15 hours on low
- Rechargeable Lithium Ion 18650 3.7v battery
- .31lbs
- Pairs easily with existing devices that require a low level light source
